Welcome to our 10th Sale!

What a ride 2024 has been! First off, we would like to praise our Savior Jesus Christ for entrusting us to tend to his wonderful creation. Secondly, we wish to take a moment and thank everyone for their thoughts, prayers and assistance surrounding the aftermath of Hurricane Helene. We have witnessed the greatness of "mankind" and the power of The Lord throughout this event. We've seen people rally to help their neighbor in a time where much of our nation is divided. Many of our region experienced life without electricity for a period. In that time, we remained steadfast in taking care of each other, the land and the livestock. Many of us learned a thing or two about ourselves, our friends and our ability to live rather simple in the 21st century. In some ways, it was a humbling experience that changed things in our life forever. We will be cleaning up down trees for years but that is minor compared to the destruction others faced. If we know one thing for certain, it is that the agricultural community has seen tough times before and will always rise with resilience.

The bulls this year are as deep as ever. We are in the 10th year of marketing bulls as the group known as The Source group. This venture began to be your SOURCE of value-added genetics from excellent people. We have never waived from our commitment to bring our customers a product that will add to your bottom line. We continue to embrace that commitment and take our job creating seedstock to heart daily. You will notice we added a few Red Angus to this event. There are a handful of coming two-year-old bulls that are flat good as well. We are excited for you to appraise our stock and hope we live up to our customers' expectations.

We would like to personally invite you to Nashville, Georgia, on December 7, 2024. The cattle market is thriving, and the outlook is exciting for the commercial cow/calf sector. If we can assist you with anything, please reach out to any of the bull owners or our wonderful hosts The Akins Family. As always the food will be wonderful, the fellowship grand, and the bulls superb.

Thanks to everyone who has supported us in the past, and we look forward to the next DECADE of being **THE SOURCE** for quality genetics from wonderful people.

God Bless,

The Source Group

SALE TERMS & CONDITIONS

Cash or good personal checks will be accepted sale day.
Cattle will not be loaded out or delivered until settlement has been made.

BREEDING GUARANTEE

ALL BULLS SELL SATISFACTION GUARANTEED. For 90 days following the date of sale, if a buyer is not satisfied for any legitimate reason, he/she is entitled to a credit, or replacement provided the animal has been properly cared for. If you have any problem please contact the breeder of the animal.

HERD HEALTH

All cattle have been inspected by a licensed veterinarian and will be accompanied by proper health certificates for immediate shipment.

PREVIEW

Bulls will be penned for viewing Friday after lunch. Anyone interested in checking out the bulls prior to December 7, contact Chandler Akins (229) 237-2449.

VIDEO SALE FORMAT

Videos of the bulls will be played during the auction. No cattle will go through a sale ring. They will be available for viewing just yards from the sale tent.

REFRESHMENTS

Lunch will be served sale day.

BAR A RANCH If you've asked any of the Bar A crew about the bulls this year, you've likely heard about the True North x Justified we have been so high on. Well, here he is. The excitement starts with 352's pedigree; generation after generation, it is stacked with "the good stuff". True North needs no introduction, and his Justified mother is one of our favorite and most exciting young cows. This bull covers all the basics we believe to be so important. He's awesome structured, excellent footed, masculine, slick haired, and very docile. When his genomics came back, we realized he does all this while being in the top 10% of the breed for marbling. If we didn't offer all our bulls, there is no doubt this is the one we would be betting on to make a big impact in our herd.

Lot 2

LOT 2

BRF MR TRUE NORTH 338

BROAD RIVER FARMS We've been using True North to breed our heifers for the last few years and plan to again this year. We love this bull. Can't say much more that will help sell him than that. He's dang good. He is a calving ease specialist with great performance. Check out his adjusted REA and huge scrotal circumference. Turn this guy out on a set of heifers this year and call us when his babies hit the ground.

ACE Burgess 512 / Dam of Lots 3, 4 & 5

BAR A RANCH If you've followed our program very long, you know how good ACE Burgess 512 has been to us. We currently have 25 direct daughters of 512 in our herd and will continue to make more. During Callie's time at Partisover, the Rainfall daughters were undoubtedly her favorite. She kept hounding us until we finally flushed 512 that way. We could not be more pleased with the results. These bulls are fundamentally good cattle. Stout-made, good-footed bulls that have performed exceptionally well and should be the kind to continue to thrive in our environment.

BAR A RANCH This pair of Resilient x 745 brothers will catch your eye with their extra power and shape. They are rugged-built, masculine, slick-haired bulls that look like they will go out and flat work. Their mother is a beautiful, picture-perfect uddered, moderate Angus cow. Combined with the extra size and length of Resilient, they have the versatility to do many different things. They each have their strengths, 308 is the more moderate-sized, lower-input type bull with an extra shot of marbling while 329 is the exceptionally nice-balanced, high-growth bull that will have you bragging on his calves at weighing time.

OLEO RANCH 320L is a great calving ease option for those that need an outcross to several of the main sires we've used in the past. He would work well behind the Justified or Rainfall derivatives we've sold in previous years. A maternal brother to 320L was the \$6000 standout in last year's sale. The dam of 320L is a picture-perfect female with tons of quality and the beautiful Angus female look. She has a perfect udder, great feet, and optimum performance for our world.

RL Justice / Sire of Lot 12, 13 & 14

Lot 14

TRADITIONS CATTLE COMPANY These three full brothers are all cut from the same mold. They are bulls with excellent base width, a level hip, great feet and legs and herd bull stature. They are sired by a calving ease, high \$M son of KG Justified that is standing at Select Sires AI stud. The dam of these three brothers is a long bodied, high-performance female with an excellent skeletal design and great growth predictors. Take one or better yet get all three of these bulls to turn out on a set of heifers and be time and money ahead.

BAR A RANCH If you are looking to moderate cow size, but keep them incredibly sound and big bodied, 395 is the one for you. We had very high hopes for his mother, one of our favorite 512 daughters, but unfortunately, we lost her way too soon. 512 and our proven herd sire, "Vern", in the same pedigree, we have no doubt he is bred for our environment. If this big-testicled bull replicates her kind in his daughters, we're sure you'll be calling us to brag on them.

OLEO RANCH Here is a performance superstar. He's got extra size and scale for those that want high test gas in their tank. 365L is a super long bodied high-performance individual. His dam is a beautiful young cow that hails from the Potts Brothers matron Blackbird 3103 female. Big, stout, growthy, black feeder steers are worth some cash now a days. 365L is going to be a great investment for his new owner.

VF LIVESTOCK 412 has been a favorite for us since he hit the ground. His awesome first calf dam did an awesome job. Her 3 flush mate brothers were one of the highlights in The Source Sale in 2022. They are now working for Turner Lynn, Jody Smith and Kirk Law. 412 combines our best cow 812 on the top and bottom and when you line up the good ones they can explode. That's what this guy does on paper. Ranking in the top 3% of the Angus breed for YW, Milk, MW; Top 4% for WW, SC; Top 10% for Hair Shedding & \$W. In total he ranks in the top 25% for all non-parent Angus bulls for 14 different traits!! This guys is had for the southeast cowherd, tons of growth to weaning, good feet, slick haired with fertility and milk packed into his daughters. 412 won't be hard to find in the sale book or in the pens on Dec. 7th.

AGE ADVANTAGED 2-YEAR-OLD BULL
VF LIVESTOCK Another big time herd bull out of our 812 donor, at 17 she is bred back to calve this spring!! This cow has done everything we have asked, from raising champions in the show ring, a donor worthy daughter to follow in her footsteps and numerous sons that have had impacts all over the southeast and 307 is no exception. This guy is a sure fire calving ease bull that can cover some cows. The Thedford calves have proved to have exceptional growth once they get here and look to be awesome cows. Find this balanced 2 year old sale day and you won't be disappointed.

Lot 31

Oleo Blackcap 014H / Dam of Lot 31

AGE ADVANTAGED COMING 2-YEAR-OLD BULL

OLEO RANCH Oleo Rebuild 346L was on our list to use as a herdsire at Oleo Ranch. He actually belongs to our oldest son Ky Alford and he has some expensive taste so you now you know why he is in *The Source* Volume 10. This bull is a good-sized creature with tons of body mass. He has as much center rib and body volume as we can pack into one. His feet are big and have the right shape. His skeleton is loose and well built. His mother is absolutely gorgeous. If his daughters resemble anything like we think they will you'll be pleased Rebuilding the nation's cow herd.

Lot 32 OLEO SPRING BREAK 343L

AGE ADVANTAGED COMING 2-YEAR-OLD BULL

OLEO RANCH We stumbled over this coming two-year old's sire in a pen of SAV Circuit Breaker sons at the annual Schaff Angus Valley Sale. Spring Break hit us hard for his robust center body and tremendously good feet. We have been pleased with how much mass and shape his calves have had in a super easy-going package. The dam of 343L is a beautiful young Growth Fund daughter that will make you ask what is that cow once you see her. We wanted to bring a handful of age advantaged bulls to the Source for customers that wish to turn out older bulls.

IRON WILL CATTLE Another second generation IWC bull that took a killer photo. Out of one of our favorite 3 year olds that has had 2 AI calves, 18L is your cant miss bull. Need a heifer bull, use him. Need to make replacements, use him. Need to add carcass, use him. The Franchise 6305 matings really clicked for us and we love them. If proof is in the pudding, we think we are headed in the right direction making bulls like him.

IRON WILL CATTLE We have been excited about this one since preg check day. His mother, Scarlett J100 is the last natural calf of Eucla X723. J100 was bred first round AI and calved Sept 25. We thought enough of her to flush after calving. Dang if she didnt take AI after the flush and calved the next year Sept 23! Thats getting it done while raising 13L. Physically imposing himself, he sports the numbers too. Top 3% Pro\$, 2% GM, and 4% Marbling. He also scanned a 15.78 ribeye and ratioed 107 Marbling. Come see for yourself a second generation mating for IWC and let us know what you think.

IRON WILL CATTLE Needing to add some power to your cow herd? This Grindstone son out of our foundation dam certainly ticks that box. As of scan day, he was the top 1% of the breed in both WW and YW. Will make some scale smashers! Will definitely add value to feeder calves with Marbling in the top 25% as well. Unique in phenotype as well, C052 adds balance and look, while keeping a rugged look of a bull ready to go work.

INNISFAIL FARMS Churchill Broadway 858F was a logical choice to utilize as an outcross sire once the data rolled out from the National Reference Sire Program. He charts 541 BR@100, 452 WR@100.7, 237 YR@101.3, and 135 IMF@106.5. 16 progeny harvest data points, and 21 DMI data points, prop up his indicators of feedlot profitability. Currently, he has 83 daughters raising 113 calves for a NR of 100.2. The real world production data has legitimized his top 1% indices. The mothers of these bulls are three standouts of the "Kate" cow family - and all descend from the great T723 that brought you 4013 and Trademark. They are cattle that have preformed extremely well in the southeast. 920, 7111, and 2014 are moderate in their stature, huge bodied, great uddered, and have the build that lasts. They are the kind of mother cow that has been the backbone of Innisfail Farm for over 50 years. If you share in our vision of making better baldies, here are 5 great options. The data backing up their lineage is full of proof of profitability in all aspects of the cattle business.

PARRISH AKINS Parrish is back with his horned Hereford consignments. His consignment two-year ago was purchased by Brian Rayburn and has done an exceptional job for him. We've had the privilege of watching him mature, and if you like these bulls as yearlings, you'll love them as two-year-olds. 303 is a big-bodied, more moderate option that has the look to make exceptional F-1 females. On the other hand, 368 has a bit more size and scale and should sire a set of feeder calves that take advantage of the record-high market.

VF LIVESTOCK Awesome female maker here. Sired by the tried and proven Online and out of the 2022 high selling Hereford donor at Partner in Progress sale for Mr. Charles Smith. 408 had a maternal sister out of R125 top the open heifers at \$8,000 as well. We've got several R125 daughters in our herd and love their fleshing ability and udder quality for Herefords. Tie on to this guy to make you some awesome baldy replacements!!

VF LIVESTOCK Some may call us crazy for selling this non-registered bull in this type of sale, but we've always said a good one is a good one even if it has pink polk-a-dots. 424's dam has 3 generations for donor cows and on the top side is one of the top donors for the Hunts at Innisfail. If there ever was a proven cross bred pedigree than this is it. We purchased his sire out of this very sale a few years back and have loved his calves and Holly Alford's brother, Tyler Hill, purchased all of our baldy yearlings earlier this summer. His cow families calves have been highly sought after in the Hunts female sales. 424's dam produced a bull 2 years ago that we kept to use on our own cows. To say we believe in this guy would be an understatement, but we will let you take him back and make some awesome baldy's on Dec 7th.

HEREFORD DIVISION

LAMBERTH FARMS This is the man! His dam is a 20/20 x 9015 female that sets the standard for females- udder quality, maternal build, and great feet. He has the #2 ribeye area amongst the Simmental-influenced bulls! This is a bull to build an entire herd around.

OLEO RANCH Everyday we breed Simmental influenced cattle we appreciate their performance, their base width and potential to leave us with high valued feeders and great replacement females. The Loverboy sired cattle have worked extremely well for us. There is a great reason he is one of the most sought-after bull in the Simmental breed. 319L is sound structured, big ended and moves with great ease. If you want a purebred Simmental that looks like a percentage bull to get extra hybrid vigor out of your English based commercial cows we got em.

OLEO RANCH We have had tremendous luck using Loverboy as a go to sire on first calf heifers. This Loverboy son is a product of one of our oldest son's past show projects. She laid down and had this calf at 58 lbs actual birth weight. We thought at first that he wouldn't make the bull pen but left him intact and decided to see how he would perform. If you want calving ease, docile, good built SimAngus bulls backed by generations of proven productive cows that work well in the Southeast you have come to the right "Source".

OLEO RANCH It always Pays to Believe. Having passion and belief in what we do everyday may be our strongest attribute in agriculture. 332L is as good as we can build a SimAngus bull from a skeletal and structural standpoint. His joints flex with ease, his spine is relaxed and pliable and his feet and legs drive with authority. His dam is an amazing young cow that works hard, milks well and breeds back on time. We've tried hard to breed productive and profitable SimAngus cattle for over two decades and appreciate cattle like 332L. Set your sites on December 7th.

OLEO RANCH Power and performance is his middle name. This Epic son has a much muscle mass and shape as you can pack into a yearling bull. NO wonder he ranks in the top 25% of the Simmental population for WW EPD. This homozygous polled baldy bull is backed by a moderate sized hard working female that delivers every year. Performance driven, documented seedstock have tremendous value in this market. Take advantage of years or our homework.

BAR A RANCH Here is a bull that has flat-performed this summer averaging 4.0 lbs per day all summer and fall. He has the length of body, size, and performance you expect from a Simmental herd sire. Combine this with his balanced-look, loose structure, and square muscle shape, we think he is a truly versatile herd sire. If you want calves that weigh up but are still fun to look at, this one needs to be at the top of your list.

BAR A RANCH Here is one good looking purebred Simmental. He's more moderate in his size, but is definitely not short on presence and power. His mother, G4, is a truly impressive 20/20 daughter that we have sure been pleased with over the last couple of years. This guy is the kind that will work well on a set of Angus based cows to make those ever-popular SimAngus females.

CHAFIN FARMS We have sold full brothers and sisters to this pair of Bet on Red sons over the past couple of years. These bulls are power packed animals with lots of muscle shape and added heaviness of structure. They are big hipped bulls with width to their skeleton and lots of overall mass. Three full sisters to these brothers have averaged over \$5000 as open heifer calves. 366L is the black baldy option while 365L is the popular red hid one. Check out the ultrasound data on this pair. Excellent Ribeye Area with IMF genetics baked in. If you wish to turn out full brothers here is your opportunity.

BAR A RANCH Female maker deluxe here. This brockle faced bull is moderate-sized, massive-bodied, and has that eye-catching look. The "Vern" progeny have proven to work extremely well in our environment, and we have pastures full of the daughters that we love. 3115's full brother was a crowd favorite two years ago that was sold to our loyal customer, Lamar Ball. Around here, we've talked about how exciting of a cross it would be to use this bull on a set of baldie F1 females. Regardless of the breed make-up, we're sure your neighbors will be knocking down the door to buy 3115 daughters.

VF LIVESTOCK This guy has been a standout since day one. His dam comes from an ELITE cow family that has produced some dominant AI stud bulls in the Simmental breed. The Melody cow family is as reliable as it comes in simmy genetics. This guy's calves will flat out hit the ground running. His sire 204, has only 2 calves in this year's sale but they are both standouts. Super stout with plenty of growth to spare. Use this guy to add muscle, growth, balance and with plenty of milk in his daughters! Don't let this guy go to your neighbor's and see how big his calf checks are for the next several years!!

AGE ADVANTAGED 2-YEAR-OLD BULL

OLEO RANCH We appreciate good red hided cattle. We've added some additional red hides to this year's event. This age advantaged Simmental bull is smooth made and super easy going. As you can tell we have been super pleased with using Loverboy in our operations. His sons and daughters do things so well. From coming easy a birth to having optimum early performance to the skeletal build and sound structure to the masculinity of the sons and femininity of the daughters they are excellent all-around cattle.
